

Generating Formats

main tex and metapost formats and all languages:

```
texexec --make --all
```

only english interface and metafun:

```
texexec --make --all en metafun
```

see: `mtexexec.pdf`

Updating

downloading, unpacking and generating:

```
cd ../tex/texmf-local
wget http://www.pragma-ade.com/context/current/cont-tmf.zip
unzip cont-tmf.zip
texexec --make --alone --all
```

see: `mininstall.pdf`

Generating Command Lists

quick reference document of dutch and english commands:

```
texexec --int=nl --pdf --global --result=setup-nl --purge x-set-12
```

```
texexec --int=en --pdf --global --result=setup-en --purge x-set-12
```

see: `x-set-12.tex`

Module Documentation

pretty printed, annotated module documentation:

```
texexec --module --pdf syst-gen.tex
```

```
texexec --module --pdf supp-*.tex
```

see: `mtexexec.tex`

Listings

verbatim listings of (ascii) files:

```
texexec --list --pdf somefile.tex
```

```
texexec --list --pdf test-*.rb
```

```
texexec --list --pdf myfile.xml
```

see: `mtexexec.tex`
